

YOGITA POPAT

Business Intelligence Analyst | Power BI Specialist | Data Analyst

Abu Dhabi, UAE 📍 +971 503352686 / +91 9284250466 ✉ yogitapopat2409@gmail.com [in](#) [LinkedIn](#) [GitHub](#)

Professional Summary

Business Intelligence Analyst (Power BI Specialist) with 2 years of experience in dashboards, data modeling, and automated reporting for Finance, HR, and Sales. Proficient in DAX, Power Query (M), SQL, and data integration from SAP HANA, Excel, and SharePoint. Reduced manual reporting by ~60% and improved cross-functional KPI visibility.

Technical Skills

BI & Visualization: Power BI (Desktop, Service, Gateway), DAX, Power Query (M), Paginated Reports, Microsoft Fabric, Tableau

Data Engineering: Data Modeling, Star Schema, ETL/ELT, Incremental Refresh, Row-Level Security (RLS), Data Warehousing

Databases & Querying: SQL (Window Functions, CTEs), MySQL, SAP HANA, Snowflake

Cloud Platforms: Microsoft Azure, AWS, Microsoft Fabric

Microsoft Ecosystem: Excel (Advanced – Power Pivot, Power Query, VLOOKUPS), Dataverse, SharePoint, Power Automate

Programming & Tools: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, Git, GitHub, VS Code, Alteryx

Analytics: KPI Design, Dashboard Storytelling, Trend Analysis, Statistical Fundamentals

Experience

Eram Company LTD (UAE – Abu Dhabi)

September 2025 – Present

Business Intelligence Analyst (Power BI Specialist)

On-Site

- Designed and deployed 10+ interactive Power BI dashboards across Finance, HR, Sales, and Operations, reducing report generation time by ~40% by replacing legacy Excel-based reporting workflows.
- Built optimized Star Schema data models by integrating SAP HANA, Excel, and internal databases across 5+ business units, while creating 50+ DAX measures and calculated columns for KPI tracking including revenue trends, employee attrition, and sales pipeline analysis.
- Automated data preparation and reporting workflows using Power Query, scheduled refresh in Power BI Service, and data transformation techniques, eliminating manual daily reporting efforts.
- Collaborated with stakeholders to gather business requirements and translate them into report specifications, while implementing Row-Level Security (RLS) for secure access management across 30+ users, reducing report revision cycles by ~50%.

Verma Bajaj Co (Uganda Based)

September 2024 – August 2025

Freelance Power BI Developer

Remote

- Delivered 8+ end-to-end Power BI solutions for international clients across retail, logistics, and finance domains, independently managing the complete project lifecycle from requirement gathering and data modeling to deployment and client training.
- Extracted, cleaned, and transformed data from SAP HANA and enterprise data sources using Power Query (M), while designing KPI-driven dashboards with drill-through functionality and dynamic filters that improved reporting turnaround by approximately ~30%.

RoundTechSquare Pvt Ltd (San Francisco, California)

May 2024 – August 2024

Full-Stack Developer Intern

Remote

- Built and maintained responsive web application modules using React.js, Next.js, and Tailwind CSS as part of an agile development team.

Projects

Custom BI Dashboard Tool — GitHub

Python, Streamlit, Pandas, Plotly, Excel Integration

- Built a Power BI-style interactive dashboard in Python using Streamlit and Plotly, enabling Excel file upload with automatic chart generation, KPI metrics, and data table preview — no Power BI license required.
- Implemented dynamic chart types (Bar, Line, Pie, Scatter, Histogram) with user-controlled axis selection and column-based filtering for exploratory data analysis.
- Designed for full local execution ensuring data privacy, keeping company data within the internal environment unlike cloud-based BI tools.

- Actively expanding with planned implementations including PDF export, multi-sheet support, date filters, and MySQL/PostgreSQL connectivity — roadmapped toward a full multi-user open-source BI platform.

Enterprise Power BI Dashboards — GitHub

Power BI, DAX, SAP HANA, On-Premises Gateway, Incremental Refresh, RLS

- Built 5 production-grade Power BI dashboards (Fleet, Visa Compliance, Finance, Collections and Expiry Tracking) with SAP HANA integration via On-Premises Data Gateway for centralized publishing.
- Optimized performance using Incremental Refresh and Row-Level Security (RLS) for department-wise data confidentiality across Finance, HR, and Operations.
- Engineered DAX measures for visa utilization, document expiry alerts (30/60/90 days), and vehicle performance indicators (MVPI).

UPI Transaction Analysis — GitHub

Power BI, Excel, DAX, Trend Analysis

- Analyzed transaction patterns across payment methods and built drill-down dashboards to explore volume, frequency, peak usage, top-performing categories, and time-based trends.

Sales Insights Dashboard — GitHub

Power BI, DAX, MySQL, Profitability Analysis

- Built a multi-page MySQL-connected sales dashboard analyzing revenue, profit margins, and regional performance, with DAX measures for YoY comparison, profit contribution, and customer segment profitability.

Education

Priyadarshini College of Engineering

B.Tech in Artificial Intelligence and Data Science

2020 – 2024

Maharashtra, India

VMV Commerce JMT Arts JJP Science College

HSSC

2019 – 2020

Maharashtra, India

Certifications

Microsoft PL-300: Power BI Data Analyst – Microsoft (In Progress)

Data Analytics Bootcamp – Alex Freberg | SQL, Python, Excel, Power BI

Tata Data Visualisation Job Simulation – Forage | Feb 2025

Quantium Data Analytics Job Simulation – Forage | May 2025
